CIO Bulletin votes ehotel® one of the top 10 service providers of 2020

CIO Bulletin, an international leadership platform for business and information technology, is not only an excellent resource for business-people, but also promotes exchange between decision-makers. To be elected one of the best service providers of the year by such professional observers of the business landscape is an honor for ehotel®, particularly because IT is not our hotel booking portal's focus of attention as much as people are. All our services and programs are about simplifying the work of business travelers, accountants and entrepreneurs.

ehotel®'s specially developed meta technology enables firms to search for hotels according to their internal conditions, as well as to make comprehensive comparative searches. The booking portal guarantees customer satisfaction. The integrated payment and invoicing system that allows the accounts for even major congresses to be conducted in a simple and transparent way has also contributed to ehotel®'s success. The fact that this comprehensive approach has convinced international greats such as CIO Bulletin shows that no flashy advertising is necessary to be recognized – with time, transparency and fairness make their point.

It only makes sense that ehotel® will continue to develop its unique technologies. "We are very happy about the award," says ehotel® CEO Fritz Zerweck. "As an online booking platform, it is important that we keep our business up-to-date. We want to be pioneers in our branch so that we always offer our customers the very best."

The ehotel® hotel booking platform bundles the accommodation offerings of all providers worldwide on one platform through META-SEARCH technology. The Berlin-based company is focusing its business on holistic support of hotel bookings and the associated services for business customers. By integrating tools and services into the systems of the companies in question and through specially developed payment and billing solutions, ehotel® ensures optimised processes, end-to-end expenditure control, compliance and cost savings for the customer. The booking platform has been repeatedly recognised for its quality of service by the German Institute for Service Quality and the market research institute ServiceValue among others. www.ehotelag.com
